Google Apps @ Cambridge

- Google Apps @ Cambridge contract available online:

<http://www.cam.ac.uk/cs/googleapps/google-apps-cambridge-contract.pdf>

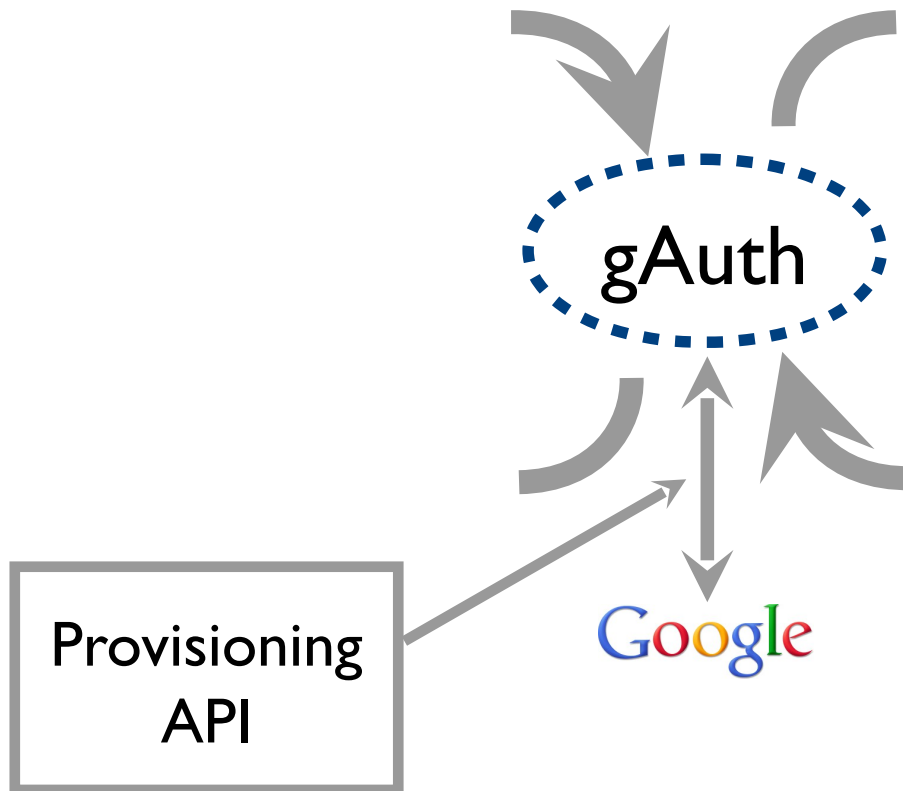

Web Authentication

gAuth

- Based on Google example Java SAML code
 - SAML (but not Shibboleth)
- Java Webapp, runs in Tomcat
- Also displays T&Cs page, and email reminder first time through
- And some other things...

Account Creation

Non-web authentication

Google Apps @ Cambridge

Token Management

Web access to Google Apps @ Cambridge always uses Raven to identify people. You can change you Raven password at <https://raven.cam.ac.uk/auth/account/#cpwd> This will affect everything you access via Raven.

Some non-web access methods (e.g. to iCal feeds) need a separate username and authentication token (Google call this a password) which you can manage here.

Your username is:

Your token is: (16 lowercase alphabetic characters)

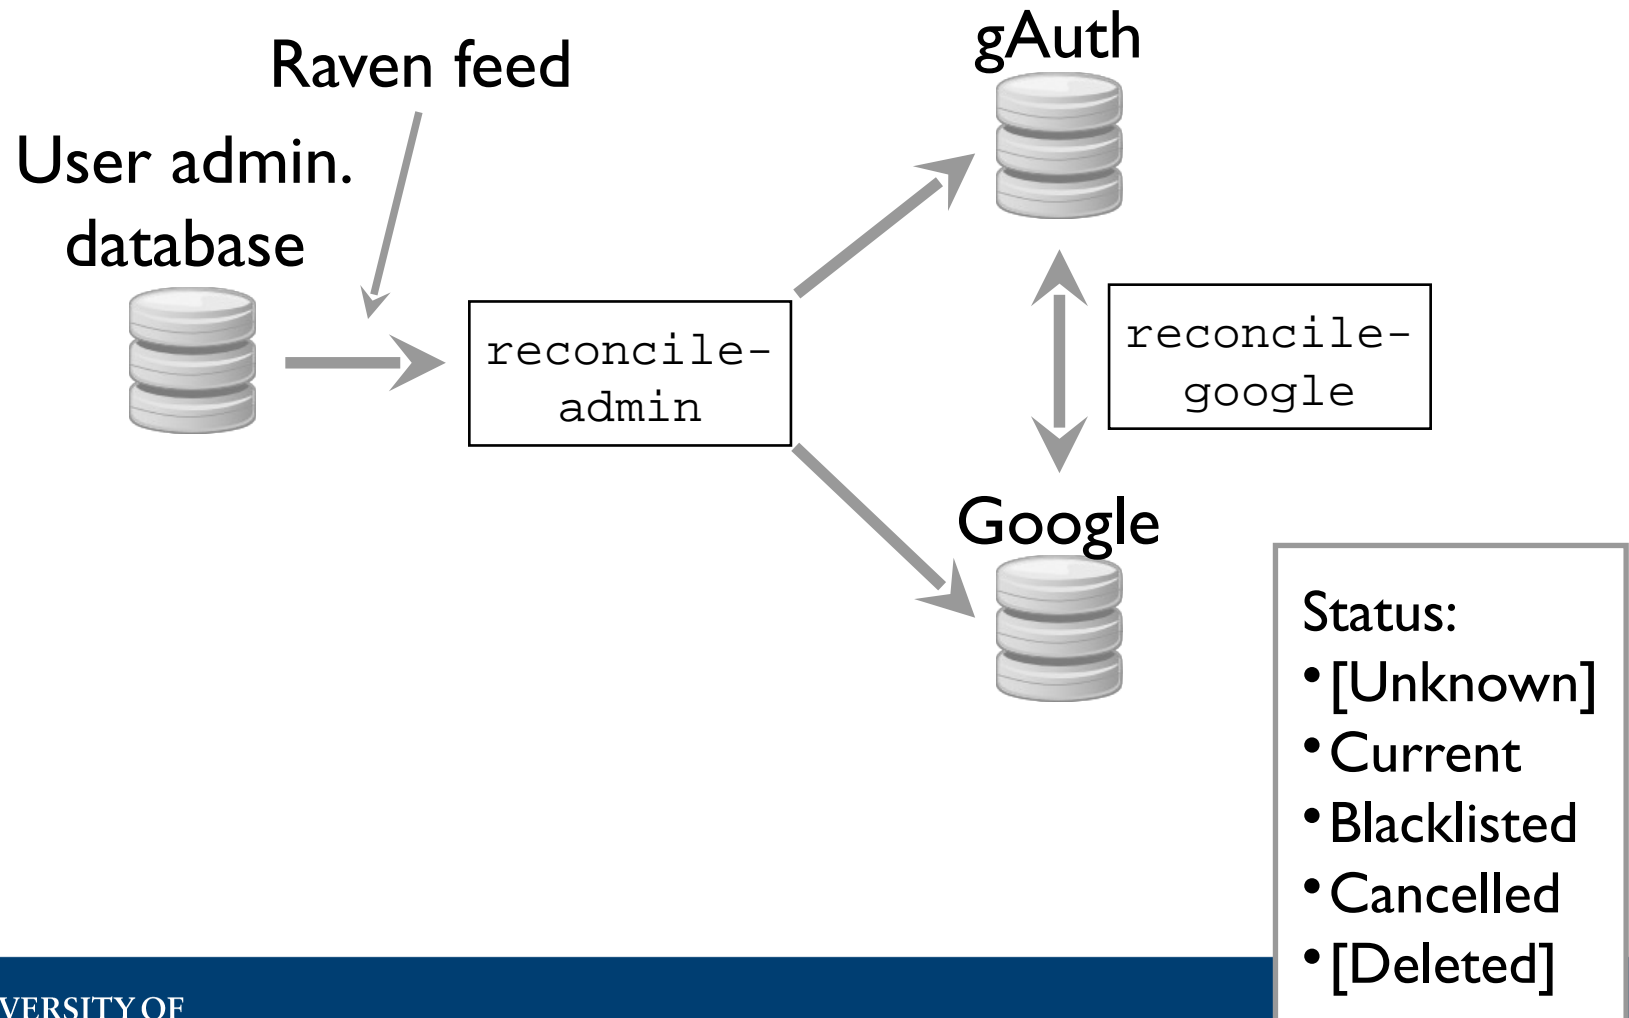

If someone else knows what your Google Apps @ Cambridge token is, or if something on which your token is stored is lost or stolen, then you should change it. All programs using the old token will need to be updated with the new one.

[Reset my token](#)

Account management

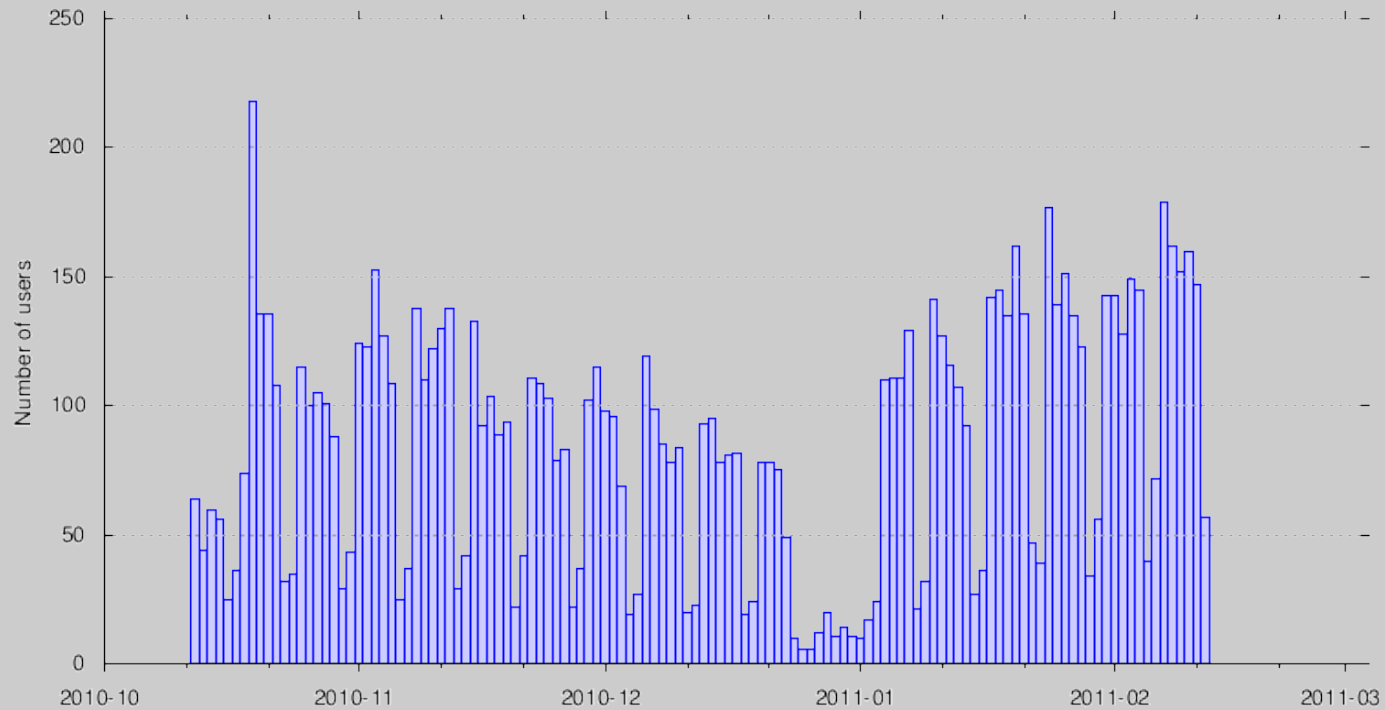

Number of accounts

<http://www-uxsup.csx.cam.ac.uk/~jw35/google-usage/>

Number of people/day

<http://www-uxsup.csx.cam.ac.uk/~jw35/google-usage/>

Plain sailing?

- Pre-existing cam.ac.uk domain
- Conflicting accounts
- ‘g’ ‘o’ ‘o’ ‘g’ ‘l’ ‘e’ not allowed in domain names
- iPhones
- Support - don't forget the support

Any questions?
