OF LONDON**

**INTERNATIONAL  
PROGRAMMES**

# Introduction

- **University of London International Programmes**
- Why learning analytics?
- **Technical considerations**
- Outcomes and reporting
- **Challenges**

# University of London International Programmes

Some key programmes:

**Undergraduate Laws**

**EMFSS (Economics, Management, Finance, Social Sciences)**

**Postgraduate Laws**

**Computing and Information Security**

**MA Education**

**Business Administration**

# Our model: some important points

**All students study flexibly at a distance, either:**

- Independent learners
- Face-to-face teaching at a local institution

**Global student cohort**

- Lots of students in lots of countries studying lots of programmes

**Wide stakeholder group**

# Learning analytics: background

## High attrition rate

- Attrition much higher than UK HE average (5.7% in 2012/13\*)

## Consequences

- Out of pocket: £millions in potential lost revenue
- Going nowhere: students not progressing

[\\*https://www.hesa.ac.uk/pis/noncon](https://www.hesa.ac.uk/pis/noncon)

# Learning analytics: background

## Requirements for a retention system

1. To better understand students, and benchmark against other institutions
2. To use innovative tech to capitalise on student data
3. To provide info to help support students' learning outcomes
4. To improve retention and increase in fee revenue

# Learning analytics: background

## PHASE 1: IDENTIFY

Pilot of Bloom Thrive analytics with ULCC and Altis

## PHASE 2: INTERVENE

Enhanced and targeted student support

# Technical considerations

## Integration of our services

- ✓ Student records: SITS and Cognos
- ✓ VLEs: live feedback and tracking access
- ? University of London Online Library
- ? Student enquiries: ESD CRM
- ✗ Social media?
- ✗ MOOCs data?

# Technical considerations

## Weights and measures

<b>Student details:</b>	Who is the student? how they are studying?
<b>Module details:</b>	Level, qualification, high attrition?
<b>Student performance:</b>	Achievement, enrolments, issues
<b>Sentiment data:</b>	‘Happiness’, text analysis
<b>Student activity:</b>	Moodle, Online Library

# Professional Accountancy

The World Class: studied  
anywhere, valued everywhere

#### Most at Risk Student Report

This report highlights the top 5 students most at risk for each reporting period. The Most at Risk Student Report includes the student's name and score as well as overall performance in general. The student's behavior over the reporting period is also included. The student's behavior is an important indicator of the student's overall performance in the reporting period.

Student Name	Score	Overall Score	Behavior
Student 1	100	100	100
Student 2	95	95	95
Student 3	90	90	90
Student 4	85	85	85
Student 5	80	80	80

Most at Risk

Sentiment

#### Sentiment Detail Report

This report provides detailed sentiment data for the reporting period. The report includes the student's name and score as well as overall performance in general. The student's behavior over the reporting period is also included. The student's behavior is an important indicator of the student's overall performance in the reporting period.

Student Name	Score	Overall Score	Behavior
Student 1	100	100	100
Student 2	95	95	95
Student 3	90	90	90
Student 4	85	85	85
Student 5	80	80	80

Sentiment Details

Summary

#### Student Risk Detail

This report provides detailed information about a specific student's risk level. The report includes the student's name and score as well as overall performance in general. The student's behavior over the reporting period is also included. The student's behavior is an important indicator of the student's overall performance in the reporting period.

Student Name	Score	Overall Score	Behavior
Student 1	100	100	100
Student 2	95	95	95
Student 3	90	90	90
Student 4	85	85	85
Student 5	80	80	80

Most At Risk Student Detail

### Sentiment Detail Report

This report contains detailed sentiment feedback on a per student basis along with their comments at both unit and overall level. Very Unhappy or Unhappy students may need to be contacted for support. The Overall Student Risk Rating summarises the contribution of multiple indicators and not just sentiment. Hence, a student may be Very Unhappy or Unhappy but that does not mean that one will appear in the Most At Risk Report.

### Most at Risk Student Report

This report highlights the top X students considered Most At Risk on a given snapshot date. The Overall Student Risk Rating incorporates student-level and unit-level risks as well as overall sentiment on a given day. Unit sentiment is factored into the unit-level risk contribution. The number of students to be identified daily and the number of days before re-identification are configured within the Data Warehouse.

#### Select Teaching Period

- (All)
- 2015/6\_2015/6

	11	V	No	7.100
	1	K	No	7.100

**Top 200 at-risk students daily**  
**Needs to identify distinct cohorts**

# Challenges

Identifying is (relatively) easy, but what about intervention?

**What comes first? Support or identification**

**Who – existing team? New staff?**

**How – Individual contact? Targeted cohorts?**

**Student expectations – will all their comments be read?**

# Challenges

## Data protection and consent

**Students need to know what we are doing and why**

**More and different data – do we have appropriate consent?**

**Important (as always) to ensure security of data**

# Challenges

## Is it worth it?

**How do you know if the predictions are accurate?**

**Not easy to track why students choose to stay or leave**

**Historical data analysis – Thrive vs. known outcome**

**Look at the big picture – success based on attrition rate reduction?**

**Qualitative feedback – is student support deemed better?**

# Challenges

## Internal

**Can all systems be integrated? The more data the better**

**Who will model the data?**

**Stakeholder and institutional buy-in**

**Who owns the predictions?**

# Any questions?

Tom Inkelaar

UNIVERSITY  
OF LONDON

INTERNATIONAL  
PROGRAMMES

- ULCC have long recognised an challenge posed to all institutions
- How to ensure interventions are **efficiently targeted**?
- Few, if any, institutions have luxury of being able to afford untargeted or misdirected interventions

- Successful tripartite collaboration to strengthen ULIP's understanding of student engagement.
- ULCC's underlying aim to develop standardised service, made more widely available as part of our Bloom portfolio
- Decision to buy, build or partner – partnering was an easy choice due to Altis expertise and closely related experience at UNE

- Targets for the service are **effectiveness** and **straightforward adoption**
- Can start with data from ULCC's Bloom VLE only – no data preparation or transfer from institution required – up and running within days
- Effectiveness of analytics only improves as institution provides more data feeds

- We want to work with more institutions to refine and improve the service – please register interest
