Hi! Just wanted to share a cool online video making website I found. I have to make a video for my internship in Vietnam this summer and wanted to see if I could use something other than iMovie for free.

<https://www.kinowave.com/> is really simple so far, lots of tutorials if you don't know how to use it, syncs with iStock, google drive, instagram, better etc and when published it can convert your video into text or URL links or a file to download.

The free "premium" version doesn't have buckets of space (as they need to make money somehow...) but there is a "business" and "education" option which has better packages!

Luna Harvey - have a look and see what you think.
